full time

Tuition fee
International students
AUD 48,000
(or ~ USD 36,480)
per programm

Disciplines
How the Camera Changed History: A century of photography and cinema, Animation, Video Art, Practice-led Research Project, Visual Arts Studio Masterclass, Art and Interaction in New Media, Studio Practice: Research Project (Digital Industry), Studio Practice: Major Research Project (Digital Industry), Digital Arts Research: contexts, practices and methodologies, Practice-led Research Project, Practice-led Research Major Project, Thesis.

University description

The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world.
ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges.
ANU counts more Nobel Laureates among staff and alumni than any other Australian university.

Estimation of program (qualities, advantages, opportunities)

The program focuses on developing the graduates' creativity and practical skills. It offers a mixture of practical and theoretical courses in key areas of digital media such as, 3D and 2D computer animation, digital visual effects, digital video, digital compositing, interactivity, coding, site-specific projection, on-line design, virtual reality, sound, and hybrid media. The students will have access to the facilities at the ANU School of Art & Design, and be able to develop their own individual and collaborative projects in the context of other researchers at the ANU.

Requirements

Australian Qualifications Framework (AQF) qualifications or international equivalents with a minimum GPA of 6/7, English.

International programmes for students of the institution

The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.

Contacts with (foreign) institutes

ANU deals with partner institutions in Asia, Europe, the United Kingdom, Canada and the United States of America.

THE (World University Rankings 2018) **48**

Duration	**Tuition fee**	**Disciplines**
2 years full time	International students **AUD 47,232 (or ~ USD 35,900)** per programm	Theories of the Object, Animation, Video Art, Hands On: Material Language, Digital Form and Fabrication, Dynamic Design and Generative Systems, Front-End Web: Crafting Online Experience, Design Practice: Engagement, Internship and Entrepreneurship, Arguing Objects, Writing About Art and Creative Practice, Design inquiry: Application of Research, Major Design inquiry: Application of Research, the number of elective courses.

University description

The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world.
ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges.
ANU counts more Nobel Laureates among staff and alumni than any other Australian university.

Estimation of program (qualities, advantages, opportunities)

The program enables students to develop digital literacy and material knowledge to become enterprising professionals across diverse design disciplines. This unique program provides contemporary design education by focusing on cutting-edge practice at the intersection of material and digital domains. A flexible structure allows students to bring together digital and material practices, in ways that broaden and deepen their skills, knowledge and design agility. Engagement and innovation are program foundations. Students will collaborate with expert teaching staff, industry, and public audiences to gain real world experience and develop versatile design expertise.

Requirements

A Bachelor degree or international equivalent with a minimum GPA of 5.0/7.0., portfolio, English.

International programmes for students of the institution

The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.

60 QS World University Rankings 2018   THE (World University Rankings 2018) **80**

Duration	**Tuition fee**	**Disciplines**
4 years full time	International students **AUD 165,600 (or ~ USD 125,890)** per programm	Introduction to visual culture in art, design and architecture, Modernism and the avant-garde, International art 1945-1990, Drawing, Visual practices, Research practices, Professional practice, Research practices advanced, Professional practice advanced, Introduction to art and design health and safety, Programming fundamentals in java, Algorithms and programming fundamentals in python, Fundamentals of C++, Introduction to computer systems, networks and security, IT professional practice, IT project management, Databases, Systems development, Object-oriented design and implementation, Studio projects, Advanced 3D, Foundations of 3D, Interactive media foundations, Advanced 3D, Interactive media studios, Emergent technologies and interfaces, Advanced visual effects, Immersive environments, the number of elective courses.

University description	Monash university is Australia's largest university (with approximately 60,000 students from over 170 countries). It continues to lead and collaborate with teams around the world, conducts research across numerous fields of study. The University has a strong teaching team with some of the best academics in the world and professional staff who provide the students with wide range of theoretical knowledge and practical skills.
Estimation of program (qualities, advantages, opportunities)	In this program the students will study visual arts as part of a double degree with information technology and be part of the changing way we communicate and experience culture in the digital domain. The students will use their information technology skills to push the boundaries of what is possible in artistic practice. From innovative design tools to digital artistic expression, they have the opportunity to take advantage of the growing intersection of IT and art.
Requirements	Successful completion Australian Year 12 or equivalent (including set score in Math), English.
International programmes for students of the institution	Monash University has student exchange agreements with over 160 partner universities in more than 35 countries across the UK, Europe, the Americas, the Middle East, Oceania and Asia. The students can study a semester or two at a foreign partner university.
Contacts with (foreign) institutes	Monash University has close contacts with a large number of foreign universities from Europe, the Americas, Asia and the Middle East.

60 QS World University Rankings 2018   THE (World University Rankings 2018) **80**

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 112,500 (or ~ USD 85,500)** per programm	Foundation studios, Architecture design studios, Technologies and environments studies, Integrated technologies environments and professional studies, Introduction to visual culture in art, design and architecture, Contemporary architecture, 19th and 20th Century architecture, Architecture and the city, Architecture communications studies, Introduction to art and design health and safety, the number of elective courses.

University description

Monash university is Australia's largest university (with approximately 60,000 students from over 170 countries). It continues to lead and collaborate with teams around the world, conducts research across numerous fields of study. The University has a strong teaching team with some of the best academics in the world and professional staff who provide the students with wide range of theoretical knowledge and practical skills.

Estimation of program (qualities, advantages, opportunities)

Creativity is the cornerstone of the program. Central to the course is the design studio where the students will investigate ideas and experiment with design processes, mentored by academics and architects from around the world. They will construct models and build full scales structures, both in class and in the community and experiment with diverse materials in our glass, woodwork and metal studios.

Requirements

Successful completion Australian Year 12 or equivalent, English.

International programmes for students of the institution

Monash University has student exchange agreements with over 160 partner universities in more than 35 countries across the UK, Europe, the Americas, the Middle East, Oceania and Asia. The students can study a semester or two at a foreign partner university.

Contacts with (foreign) institutes

Monash University has close contacts with a large number of foreign universities from Europe, the Americas, Asia and the Middle East.

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 102,900 (or ~ USD 78,200)** per programm	Fashion Design Studios, Impact Labs (Place, People, Planet, Purpose), Introducing Design Fabrication, Design Visualisations, Emerging Design Technology, Design Consequences, Global Fashion Cultures, Fashion Textiles and Technology, Wearable Products, Applied Materials, Products and Processes, Image Design and Production, Elective.

University description

Queensland University of Technology (QUT) is a major Australian university with a global outlook and a real-world focus, it has close links with industry and its relevant teaching and applied research. Industry representatives and professionals contribute to QUT course development, adding a practical perspective to theoretical education. QUT academic staff consult in industry and work on industry projects which often involve students. Staff and students have access to the latest teaching technology.

Estimation of program (qualities, advantages, opportunities)

The program provides industry-standard facilities. The students will be advised by leading industry mentors, and embrace the challenges and opportunities of twenty-first century fashion including ethics and sustainability, industry practices and emerging digital technologies. In the studio, the students will develop your design identity, working individually and in teams on real-world briefs and projects.

Requirements

Completed Australian Year 12, or equivalent qualification, portfolio, English.

International programmes for students of the institution

The outbound Student Exchange program offers students the opportunity to study for one or two semesters at an overseas partner institution and earn credits towards their QUT degree.QUT has exchange agreements with more than 200 partner institutions in 43 countries across the world.

Contacts with (foreign) institutes

QUT international partner institutions and exchange destinations include: Africa, Asia, Europe, North and Central America, South America.

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 97,500 (or ~ USD 74,100)** per programm	Computer Games Studies, Game Production and Technology, IT Systems Design, Building IT Systems, Animation Aesthetics, CGI Foundations, Game Studios (Mini-Game Development, Applied Game Development, Game Innovation), Digital Worlds, Interactive Narrative Design, People Context and Technology, Fundamentals of Game Design, Immersive Game Level Design, CGI Technologies, Game Design in Different Contexts, Critical Experience Design, Capstone Project (Game Design), Digital Creatures, Programming Principles, Algorithms and Complexity, Capstone Project (Game Development), Game Engine Theory and Application and Technology, Elective.

University description

Queensland University of Technology (QUT) is a major Australian university with a global outlook and a real-world focus, it has close links with industry and its relevant teaching and applied research. Industry representatives and professionals contribute to QUT course development, adding a practical perspective to theoretical education. QUT academic staff consult in industry and work on industry projects which often involve students. Staff and students have access to the latest teaching technology.

Estimation of program (qualities, advantages, opportunities)

The program allows students to gain experience in the whole process of game and interactive media development, from identification and evaluation of ideas, creation of design concepts, critique of existing and potential products, analysis of cultural impact and industry trends, through to the development and delivery of a final product. The students will learn about the games and interactive environments industries through interacting with industry members, reviewing the development process of games and related products, participating in class discussions and studying industry literature. The students will discover visualisation, interaction and communication techniques as applied to games and interactive media. A strong foundation in both entertainment technology and creative skills is complemented with options in games programming, including graphics programming and game artificial intelligence. They will be introduced to generic programming concepts and problem-solving strategies, team work, and the ethical and social responsibilities of an interactive media professional.

Requirements

Completed Australian Year 12, or equivalent qualification (including scores in Math), English.

International programmes for students of the institution

Tuition fee
International students
**AUD 74,880
(or ~ USD 56,900)**
per programm

Disciplines
Landscape Architecture Design Research Studios, Landscape Architecture Design Research Seminars, Landscape Architecture Professional Practice, Landscape Architecture Postgraduate Special Initiative, Landscape Architecture Masters Design Research Project, Elective.

University description
RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)
The program offers a distinguished professional education, this program is accredited by the Australian Institute of Landscape Architects (AILA). The program is recognized as a world-class facility in fostering design knowledge, critical thinking, and design advocacy through innovative teaching and research. The program will equip the students to become a leader and innovator in Landscape Architectural practice.
Design research projects undertaken within this program sit at a contemporary and international level. Studios are led by distinguished local and international academic practitioners drawing from a diverse field of knowledge and experience.

Requirements
Successfully completed an Australian Bachelor degree (or equivalent overseas qualification) in architectural design, landscape architecture or an related design field, portfolio, CV, English.

International programmes for students of the institution
RMIT global networks give the students opportunities to enhance their education or research experience: cross-campus study to RMIT's campuses in Vietnam; semester exchanges to more than 200 partner institutions in more than 31 cities in three continents; short-term study tours and programs to Europe, Asia and the Americas; international work experience with global companies in Europe, Asia and the USA, as part of RMIT's International Industry Experience and Research Program (RIIERP). All RMIT students – both domestic and international – have the chance to participate in international experiences.

Contacts with (foreign) institutes
RMIT has partnerships with leading universities across the globe.

University description
RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)
The program allows the students to push their design practice into new areas by broadening your horizons and embracing new ideas. The program centered on learning through design studios, which make up the majority of this program and are taught in small groups. Studios provide a unique way of exploring ideas by challenging future designers and run by academics and practicing design leaders from local and international architectural and design firms.
This program has strong industry links that allows students to connect with local and global leaders in the architecture, design, engineering and technology industries.

Requirements
Successfully completed an Australian Bachelor degree (or equivalent overseas qualification), personal statement, CV, English.

full time

Tuition fee
International students
AUD 62,400
(or ~ USD 47,400)
per programm

Disciplines
Inclusive and Participatory Design, Integrative Design Studio, Cross-Cultural Social Design Strategy, Eco-Design Studio, Creative Entrepreneurship, Design Futures, Global Innovation & Interdisciplinary Collaboration Studies, Digital Sketching and Ideation, CAD for Products and Interiors, Animation and Motion Graphics, 3D Scanning and Printing, Branding and Creative Innovation, Designing for Change, Elective.

University description
Swinburne is a globally-engaged institution leading the way in science, technology, business, design and innovation, it has an international reputation for quality research. It attracts world-class minds and participates in world-changing projects and partnerships, provides high-quality teaching and research and graduate outcomes.

Estimation of program (qualities, advantages, opportunities)
The program is designed for students from a range of design or related fields, it emphasizes a mix of interdisciplinary collaboration and provides a project-based, studio environment. Students enhance their expertise within a chosen design field, including visual communication design, industrial design, interior architecture and digital media design. They also broaden their skills and knowledge in design practice, 3D printing, interaction design, design management, computer-aided design and visualization tools.
Students have the option to participate in study tours and projects with Design Factory Melbourne.

Requirements
Graduate Certificate of Design or equivalent, portfolio, English.

International programmes for students of the institution
Swinburne offers different international programs: short-term overseas study programs, student exchange program at a partner university (for semester or more), overseas internships, etc.

Contacts with (foreign) institutes
Swinburne has relationships with foreign universities in the following regions: Americas, Asia, Europe, Middle East.

Swinburne University of Technology

Duration
2 years
full time

Tuition fee
International students
AUD 62,400 (or ~ USD 47,400)
per programm

Disciplines
Design Research Studios, Dynamic Modelling of Cities, Theories of Buildings and Cities, Urban Informatics and Modelling, Urban Economics and Governance, Planning Law, Strategic & Statutory Planning, Digital Sketching and Ideation, Animation and Motion Graphics , Visualisation and Presentation Techniques, Elective.

University description

Swinburne is a globally-engaged institution leading the way in science, technology, business, design and innovation, it has an international reputation for quality research. It attracts world-class minds and participates in world-changing projects and partnerships, provides high-quality teaching and research and graduate outcomes.

Estimation of program (qualities, advantages, opportunities)

The program emphasizes upon urban information, data and modelling. The students will embed authentic learning experiences, such as real-world project briefs in design studio, enabling students to get the experience and develop the competencies most in demand. This program also aims to develop pathways for students from and into related fields, such as planning, architecture, and landscape architecture.

Requirements

Graduate Certificate of Design or equivalent, portfolio, English.

International programmes for students of the institution

Swinburne offers different international programs: short-term overseas study programs, student exchange program at a partner university (for semester or more), overseas internships, etc.

Contacts with (foreign) institutes

Swinburne has relationships with foreign universities in the following regions: Americas, Asia, Europe, Middle East.

Disciplines
Design Studies, Architectural Media Studies, Modern Architecture and Urbanism, Introduction to Sustainability and Technology, Design Technology Studies, Rise of the City, Environmental Design Studies, Worlds of Architecture, Professional Studies, Elective.

University description	The University of Auckland is New Zealand's flagship, research-led university, known for the excellence of its teaching, its research, and its service to local, national and international communities.
Estimation of program (qualities, advantages, opportunities)	The program introduces the students to the fundamental aspects of architecture. Through studio courses, real world case studies and future-based speculation projects, the students will develop their design skills and creative practice, will have access to software used in the industry as well as fully-equipped workshops to bring the students' concepts to life.
Requirements	International Baccalaureate Diploma with a minimum total score of 24, General Certificate of Education (GCE) Advanced Level, portfolio, English.
International programmes for students of the institution	The University's 360° Auckland Abroad student exchange program enables New Zealand students to spend one or two semesters at one of the University's more than 90 tertiary exchange partners worldwide.
Contacts with (foreign) institutes	The University has a wide network of international affiliations and formal agreements with 174 universities in 40 countries.

per programm

Disciplines
Global Foundations of Design, Foundations of Design: Representation, Construction as Alchemy, Digital Design, Modern Architecture: Momo to Pomo, Construction Analysis, Environmental Building Systems, Construction Design, Capstone: Design Studio Epsilon, Design Studios

University description	The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.
Estimation of program (qualities, advantages, opportunities)	The program allows the student to combine the humanities, sciences and visual and performing arts within a single degree. The Architecture major teaches students to apply design thinking, a creative, solution-focused approach, to imagine future environments for living, working and playing in our age of environmental change, rapid urbanisation, global flows of people, materials and capital and exponentially increasing digital capabilities. Design lies at the heart of the architectural process and is underpinned by an expertise in technologies for representing imagined environments in 2D and 3 D (analogue and digital), an understanding of technologies of building (structural and material systems, building science and environmental systems), and a knowledge of precedents from history (architectural, landscape and urban). Consequently, the major is hinged around a spine of design studios which are supported by a sequence of subjects that teach skills in representation, technologies, and histories of design. Students are engaged in varied learning contexts that include lectures, tutorials, digital learning environments, site visits, a fabrication workshop and a research library where ideas, skills and knowledge can be learned, shared, debated, and tested.
Requirements	English, ATAR Based admission (entry score) 85
International programmes for students of the institution	The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).
Contacts with (foreign) institutes	The University has exchange partners universities in destinations all over the world, including Canada, Europe, USA, China

3 years
full time

Tuition fee
International students
AUD 129,631 (or ~ USD 98,520)
per programm

Disciplines
Architectural Technology, Applied Architectural Technology, Architectural Cultures: Modernism, After Modernism, Construction Methods, Twenty-first Century Architecture, the number of Architecture Studios, Architectural Practice, Design Thesis and the number of elective courses.

University description
The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)
The Master of Architecture is a professional program which prepares graduates for employment as architects. The program incorporates research-led teaching, problem-based collaborative learning, professional engagement, and a diverse mature cohort. It combines art, science and technology with business, social and environmental concerns.
The program provides graduates with design skills that will contribute to the improvement of built environment, a grounding in the rich lessons of architectural history, theory and technology enabling them to develop innovative architecture, relevant to time and place, people and culture, the skills to manage an architectural practice and work within teams, the ability to use resources, materials and technologies to produce responsible and sustainable architecture.

Requirements
·An undergraduate degree with a major in architecture or architectural studies with a weighted average of at least 65% or equivalent to the University of Melbourne grading scheme.
·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program.
·A design portfolio.

International programmes for students of the institution
The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

Disciplines

Shaping the Landscape, Plants in the Landscape, Performative Ecologies, History of Landscape Architecture, Contemporary Landscape Theory, Landscape Detail Design, Constructed Ecologies, Landscape Studios: Design Techniques, Site and Design, Speculations, Strategies, Sustainable Urbanism, Landscape Practice, Landscape Architecture Design Thesis and the number of Elective courses.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The program provides the graduates with a strong grounding in ecology and urbanism. This knowledge will be complemented by in-depth study of history and theory encompassing: contemporary landscape architecture, urban design theory, cross-cultural perspectives of space and cities, history of landscape architecture and architecture. The dominant mode of teaching and learning is through design studios supplemented by specialist landscape architecture subjects and electives from related built environment disciplines.

Requirements

·A minimum three-year undergraduate degree with a landscape architecture major with a weighted average of at least 65%, or equivalent to the University of Melbourne grading scheme.
·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program.
·A design portfolio.
·English.

Architectural Communications, Computational Design (Fundamentals, Intermediate, Advanced), Design Computing, Computational Design Theory, Building Information Modelling, Urban Data, Ubiquitous Cities, Building Data, Design Information Management, Advanced Digital Fabrication, Human Machine Interaction, Graduation Project: Practice, Graduation Project: Theory, Digital Collaboration Studio, the number of elective courses.

University description
The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)
The program is the nexus of architecture and design with engineering and science all through a profound understanding of computing and computation. Computers have infiltrated all aspects of the built environment. Thus, the program focuses on applying state of the art thinking in design, architecture and urbanism with theories from engineering and science together with frontier computer skills and digital fabrication technologies. The resulting creative, technical and aesthetic solutions are taught in individual interlinked modules. The program offers unique skills on the application of digital technologies in the built environment to face the challenges of the 21st century.

Requirements
ATAR score 75 or equivalent, English.

International programmes for students of the institution
UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

Contacts with (foreign) institutes
UNSW has formal relationships with more than 200 international partners. UNSW is a foundation member of the prestigious Universitas 21 network, an international network of leading research-intensive universities in 15 countries, which provides a global platform for student mobility and academic engagement.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program provides a studio based, critical, research-led education in the overarching discipline of design. The program builds on UNSW Art & Design's strengths in equipping graduates with a commitment to material quality coupled with critical idealism; it emphasizes a distinctive understanding of how design can change our societies, grounded in a deep reflection on diverse historical, social and cultural values. The graduates understand how design-led solutions assist people to perform at their best in agile and rapidly changing environments. The merging of making, criticality, technology, research, management and business provides graduates with transferable skills for careers across a range of existing and emerging design fields.

Requirements

University description

The University of Queensland (UQ) is one of Australia's leading research and teaching institutions. UQ has a strong focus on teaching excellence, having won more Australian Awards for University Teaching than any other in the country and attracting the majority of Queensland's highest academic achievers, as well as top interstate and overseas students. It also offers significant support to higher degree by research (HDR) students through a broad range of scholarships and research travel awards, dedicated office spaces, skills training, and professional development opportunities.

Estimation of program (qualities, advantages, opportunities)

The program is taught by leading academics and researchers at one of the top three architecture schools in Australia. The program has studio-based format, which provide the students with opportunities to develop special areas of interest. They might collaborate with industry, research solutions to design problems, meet real clients, or visit projects. Learn to design in response to climate and context, from lecturers with strong local industry links and an international perspective.
The students will study design principles, sustainability, emerging technologies, the history of buildings and culture, and more.

Requirements

Queensland Year 12 or equivalent, English.

International programmes for students of the institution

UQ has over 180 exchange partner universities in 41 countries (Europe, Asia, Africa, North America). Student participate in exchange programs to get global experience, develop their professional and personal skills.

Contacts with (foreign) institutes

UQ has close relationships with a large number of foreign universities, participating in exchange programs and research programs.

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 118,500*** **(or ~ USD 90,000)** per programme	Architectural History/Theory; Architectural Sketching and Drawing; Architectural Studio; Architectural Technologies; Architecture Professional Practice; Art Processes; Elective

University description	The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.
Estimation of program (qualities, advantages, opportunities)	The program covers: study for design for the built environment through a studio-based program that involves working on real-world projects in and around Sydney; the students will undertake a core program in architectural history and theory, communications, technology and design workshops, get access to electives drawn from across disciplines in arts, digital design, sustainability and urban design. Each semester revolves around a studio which explores aspects of the design process relating directly to the practice of the architectural profession. The studios are supplemented by core units of study in architectural history and theory, communications, technologies and art workshops. Methods of study in the course will include studio work, lectures, seminars, field trips, and workshops.
Requirements	Secondary education qualification (NSW Higher School Certificate), English language requirements. Domestic applicants shall submit a portfolio of work in support of their application.
International programmes for students of the institution	During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).
Contacts with (foreign) institutes	The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.

Theories of the Object, Animation, Video Art, Hands On: Material Language, Digital Form and Fabrication, Dynamic Design and Generative Systems, Front-End Web: Crafting Online Experience, Design Practice: Engagement, Internship and Entrepreneurship, Arguing Objects, Writing About Art and Creative Practice, Design inquiry: Application of Research, Major Design inquiry: Application of Research, the number of elective courses.

University description

The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world.
ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges.
ANU counts more Nobel Laureates among staff and alumni than any other Australian university.

Estimation of program (qualities, advantages, opportunities)

The program enables students to develop digital literacy and material knowledge to become enterprising professionals across diverse design disciplines. This unique program provides contemporary design education by focusing on cutting-edge practice at the intersection of material and digital domains. A flexible structure allows students to bring together digital and material practices, in ways that broaden and deepen their skills, knowledge and design agility. Engagement and innovation are program foundations. Students will collaborate with expert teaching staff, industry, and public audiences to gain real world experience and develop versatile design expertise.

Requirements

A Bachelor degree or international equivalent with a minimum GPA of 5.0/7.0., portfolio, English.

International programmes for students of the institution

The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.

Contacts with (foreign) institutes

ANU deals with partner institutions in Asia, Europe, the United Kingdom, Canada and the United States of America.

Duration
4 years
full time

Tuition fee
International students
AUD 165,600
(or ~ USD 125,890)
per programm

Disciplines
Introduction to visual culture in art, design and architecture, Modernism and the avant-garde, International art 1945-1990, Drawing, Visual practices, Research practices, Professional practice, Research practices advanced, Professional practice advanced, Introduction to art and design health and safety, Programming fundamentals in java, Algorithms and programming fundamentals in python, Fundamentals of C++, Introduction to computer systems, networks and security, IT professional practice, IT project management, Databases, Systems development, Object-oriented design and implementation, Studio projects, Advanced 3D, Foundations of 3D, Interactive media foundations, Advanced 3D, Interactive media studios, Emergent technologies and interfaces, Advanced visual effects, Immersive environments, the number of elective courses.

University description	Monash university is Australia's largest university (with approximately 60,000 students from over 170 countries). It continues to lead and collaborate with teams around the world, conducts research across numerous fields of study. The University has a strong teaching team with some of the best academics in the world and professional staff who provide the students with wide range of theoretical knowledge and practical skills.
Estimation of program (qualities, advantages, opportunities)	In this program the students will study visual arts as part of a double degree with information technology and be part of the changing way we communicate and experience culture in the digital domain. The students will use their information technology skills to push the boundaries of what is possible in artistic practice. From innovative design tools to digital artistic expression, they have the opportunity to take advantage of the growing intersection of IT and art.
Requirements	Successful completion Australian Year 12 or equivalent (including set score in Math), English.
International programmes for students of the institution	Monash University has student exchange agreements with over 160 partner universities in more than 35 countries across the UK, Europe, the Americas, the Middle East, Oceania and Asia. The students can study a semester or two at a foreign partner university.
Contacts with (foreign) institutes	Monash University has close contacts with a large number of foreign universities from Europe, the Americas, Asia and the Middle East.

20 QS World University Rankings 2018　　　THE (World University Rankings 2018) 48

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 93,000 (or ~ USD 70,680)** per programm	Introduction to visual culture in art, design and architecture, Design and the avant-garde, Sociologies of design, Research for design, Design strategy and professional practice, Drawing, Collaborative design studio, Industrial design studios, Introduction to art and design health and safety, Elective.

University description

Monash university is Australia's largest university (with approximately 60,000 students from over 170 countries). It continues to lead and collaborate with teams around the world, conducts research across numerous fields of study. The University has a strong teaching team with some of the best academics in the world and professional staff who provide the students with wide range of theoretical knowledge and practical skills.

Estimation of program (qualities, advantages, opportunities)

The program will give the students an understanding of materials, manufacturing and how people use products that improve society, enrich our culture and contribute to our economy – from furniture and smartphones, to domestic appliances and public transport. The students will develop practical knowledge and technical skills required for a career as an industrial designer.

Requirements

Successful completion Australian Year 12 or equivalent, English.

International programmes for students of the institution

Monash University has student exchange agreements with over 160 partner universities in more than 35 countries across the UK, Europe, the Americas, the Middle East, Oceania and Asia. The students can study a semester or two at a foreign partner university.

247 QS World University Rankings 2018

THE (World University Rankings 2018) **201-250**

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 97,500 (or ~ USD 74,100)** per programm	Computer Games Studies, Game Production and Technology, IT Systems Design, Building IT Systems, Animation Aesthetics, CGI Foundations, Game Studios (Mini-Game Development, Applied Game Development, Game Innovation), Digital Worlds, Interactive Narrative Design, People Context and Technology, Fundamentals of Game Design, Immersive Game Level Design, CGI Technologies, Game Design in Different Contexts, Critical Experience Design, Capstone Project (Game Design), Digital Creatures, Programming Principles, Algorithms and Complexity, Capstone Project (Game Development), Game Engine Theory and Application and Technology, Elective.

University description

Queensland University of Technology (QUT) is a major Australian university with a global outlook and a real-world focus, it has close links with industry and its relevant teaching and applied research. Industry representatives and professionals contribute to QUT course development, adding a practical perspective to theoretical education. QUT academic staff consult in industry and work on industry projects which often involve students. Staff and students have access to the latest teaching technology.

Estimation of program (qualities, advantages, opportunities)

The program allows students to gain experience in the whole process of game and interactive media development, from identification and evaluation of ideas, creation of design concepts, critique of existing and potential products, analysis of cultural impact and industry trends, through to the development and delivery of a final product. The students will learn about the games and interactive environments industries through interacting with industry members, reviewing the development process of games and related products, participating in class discussions and studying industry literature. The students will discover visualisation, interaction and communication techniques as applied to games and interactive media. A strong foundation in both entertainment technology and creative skills is complemented with options in games programming, including graphics programming and game artificial intelligence. They will be introduced to generic programming concepts and problem-solving strategies, team work, and the ethical and social responsibilities of an interactive media professional.

Requirements

Completed Australian Year 12, or equivalent qualification (including scores in Math), English.

International programmes for students of the institution

The outbound Student Exchange program offers students the opportunity to study for one or two semesters at an overseas partner institution and earn credits towards their QUT degree.QUT has exchange agreements with more than 200 partner institutions in 43 countries across the world.

Contacts with (foreign) institutes

QUT international partner institutions and exchange destinations include: Africa, Asia, Europe, North and Central America, South America.

RMIT University

247 QS World University Rankings 2018   THE (World University Rankings 2018) **401–500**

Duration
3 years
full time

Tuition fee
International students
**AUD 100,800
(or ~ USD 76,600)**
per programm

Disciplines
Animation and Interactive Media Studios, Animation and Interactive Media Design, Animation and Interactive Media Studies History, Animation and Interactive Media Design for Movement, Animation and Interactive Media Studies Futures, 2D Animation, 3D Animation, Visual Effects, Animation and Interactive Media Project Concepts, Animation and Interactive Media Major Project, 2D Animation Advanced, 3D Animation Advanced and the number of elective courses.

University description
RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)
This is one of the most popular animation programs in Victoria, where the students will become specialists in animation and interactive media design including: animation (2D and 3D), motion graphics, special effects and interactive media. This program looks at animation in all its forms, from the animated character to motion graphics across linear and interactive environments. Presented in a creative and supportive environment, the program focuses on intellectual investigation and conceptual development. Upon graduating, the students will demonstrate aesthetic and intellectual maturity and strong technical abilities within design, media and art disciplines.

Requirements
Successfully completed an Australian Year 12 (or equivalent senior secondary school) qualification, portfolio, applicant statement, interview (not necessary).

International programmes for students of the institution
RMIT global networks give the students opportunities to enhance their education or research experience: cross-campus study to RMIT's campuses in Vietnam; semester exchanges to more than 200 partner institutions in more than 31 cities in three continents; short-term study tours and programs to Europe, Asia and the Americas; international work experience with global companies in Europe, Asia and the USA, as part of RMIT's International Industry Experience and Research Program (RIIERP). All RMIT students – both domestic and international – have the chance to participate in international experiences.

Contacts with (foreign) institutes
RMIT has partnerships with leading universities across the globe.

THE (World University Rankings 2018) **192**

Duration	Tuition fee	Disciplines
3 years full time	International students **NZD 114,047 (or ~ USD 77,550)** per programm	Design Studies, Architectural Media Studies, Modern Architecture and Urbanism, Introduction to Sustainability and Technology, Design Technology Studies, Rise of the City, Environmental Design Studies, Worlds of Architecture, Professional Studies, Elective.

University description

The University of Auckland is New Zealand's flagship, research-led university, known for the excellence of its teaching, its research, and its service to local, national and international communities.

Estimation of program (qualities, advantages, opportunities)

The program introduces the students to the fundamental aspects of architecture. Through studio courses, real world case studies and future-based speculation projects, the students will develop their design skills and creative practice, will have access to software used in the industry as well as fully-equipped workshops to bring the students' concepts to life.

Requirements

International Baccalaureate Diploma with a minimum total score of 24, General Certificate of Education (GCE) Advanced Level, portfolio, English.

International programmes for students of the institution

The University's 360° Auckland Abroad student exchange program enables New Zealand students to spend one or two semesters at one of the University's more than 90 tertiary exchange partners worldwide.

Contacts with (foreign) institutes

The University has a wide network of international affiliations and formal agreements with 174 universities in 40 countries.

The University of Melbourne

41 QS World University Rankings 2018   THE (World University Rankings 2018) **32**

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 90,688 (or ~ USD 68,900)** per programm	Related Studies Painting, Related Studies Photography, Related Studies Sculpture & Spatial Prac, Related Studies Drawing & Printmedia, the number of Critical and Theoretical Studies, the number of Studio Studies.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

This program is a specialist course that will help the student to develop practical skills and theoretical knowledge in the visual arts. From the outset, its studio projects are expected to demonstrate investigation and experimentation with a range of concepts, materials, techniques and processes. The studies will culminate in a resolved body of artwork for inclusion in the Graduate Exhibition at the conclusion of the degree.

The students obtain knowledge and skills to maintain an independent artistic practice, develop confidence to undertake experimental technical/artistic approaches in developing set projects, develop understanding of topics in contemporary art criticism and aesthetic theory.

Requirements

English, Interview, Folio.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

Contacts with (foreign) institutes

The University has exchange partners universities in destinations all over the world, including Canada, Europe, USA, China.

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 96,440-134,136 (or ~ USD 73,300-101,940)** per programm	Global Foundations of Design, Foundations of Design: Representation, Construction as Alchemy, Digital Design, Modern Architecture: Momo to Pomo, Construction Analysis, Environmental Building Systems, Construction Design, Capstone: Design Studio Epsilon, Design Studios.

University description	The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.
Estimation of program (qualities, advantages, opportunities)	The program allows the student to combine the humanities, sciences and visual and performing arts within a single degree. The Architecture major teaches students to apply design thinking, a creative, solution-focused approach, to imagine future environments for living, working and playing in our age of environmental change, rapid urbanisation, global flows of people, materials and capital and exponentially increasing digital capabilities. Design lies at the heart of the architectural process and is underpinned by an expertise in technologies for representing imagined environments in 2D and 3 D (analogue and digital), an understanding of technologies of building (structural and material systems, building science and environmental systems), and a knowledge of precedents from history (architectural, landscape and urban). Consequently, the major is hinged around a spine of design studios which are supported by a sequence of subjects that teach skills in representation, technologies, and histories of design. Students are engaged in varied learning contexts that include lectures, tutorials, digital learning environments, site visits, a fabrication workshop and a research library where ideas, skills and knowledge can be learned, shared, debated, and tested.
Requirements	English, ATAR Based admission (entry score) 85.
International programmes for students of the institution	The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

University description	The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.
Estimation of program (qualities, advantages, opportunities)	The Master of Architecture is a professional program which prepares graduates for employment as architects. The program incorporates research-led teaching, problem-based collaborative learning, professional engagement, and a diverse mature cohort. It combines art, science and technology with business, social and environmental concerns. The program provides graduates with design skills that will contribute to the improvement of built environment, a grounding in the rich lessons of architectural history, theory and technology enabling them to develop innovative architecture, relevant to time and place, people and culture, the skills to manage an architectural practice and work within teams, the ability to use resources, materials and technologies to produce responsible and sustainable architecture.
Requirements	·An undergraduate degree with a major in architecture or architectural studies with a weighted average of at least 65% or equivalent to the University of Melbourne grading scheme. ·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program. ·A design portfolio.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The program provides the graduates with a strong grounding in ecology and urbanism. This knowledge will be complemented by in-depth study of history and theory encompassing: contemporary landscape architecture, urban design theory, cross-cultural perspectives of space and cities, history of landscape architecture and architecture. The dominant mode of teaching and learning is through design studios supplemented by specialist landscape architecture subjects and electives from related built environment disciplines.

Requirements

·A minimum three-year undergraduate degree with a landscape architecture major with a weighted average of at least 65%, or equivalent to the University of Melbourne grading scheme.
·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program.
·A design portfolio.
·English.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program is the nexus of architecture and design with engineering and science all through a profound understanding of computing and computation. Computers have infiltrated all aspects of the built environment. Thus, the program focuses on applying state of the art thinking in design, architecture and urbanism with theories from engineering and science together with frontier computer skills and digital fabrication technologies. The resulting creative, technical and aesthetic solutions are taught in individual interlinked modules. The program offers unique skills on the application of digital technologies in the built environment to face the challenges of the 21st century.

Requirements

ATAR score 75 or equivalent, English.

International programmes for students of the institution

UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

University description

The University of Queensland (UQ) is one of Australia's leading research and teaching institutions. UQ has a strong focus on teaching excellence, having won more Australian Awards for University Teaching than any other in the country and attracting the majority of Queensland's highest academic achievers, as well as top interstate and overseas students. It also offers significant support to higher degree by research (HDR) students through a broad range of scholarships and research travel awards, dedicated office spaces, skills training, and professional development opportunities.

Estimation of program (qualities, advantages, opportunities)

The program is taught by leading academics and researchers at one of the top three architecture schools in Australia. The program has studio-based format, which provide the students with opportunities to develop special areas of interest. They might collaborate with industry, research solutions to design problems, meet real clients, or visit projects. Learn to design in response to climate and context, from lecturers with strong local industry links and an international perspective.
The students will study design principles, sustainability, emerging technologies, the history of buildings and culture, and more.

Requirements

Queensland Year 12 or equivalent, English.

International programmes for students of the institution

UQ has over 180 exchange partner universities in 41 countries (Europe, Asia, Africa, North America). Student participate in exchange programs to get global experience, develop their professional and personal skills.

Contacts with (foreign) institutes

UQ has close relationships with a large number of foreign universities, participating in exchange programs and research programs.

50 QS World University Rankings 2018　　　　　　THE (World University Rankings 2018) **61**

Duration **1,5 years** full time	Tuition fee International students **AUD 53,250 (or ~ USD 40,470)** per programm	**Disciplines** Software Development in Java, Sound Design for New Media, Urban Data and Science of Cities, Usability Engineering, Web Application Development, Audio Production, Audio Systems and Measurement, Computer and Network Organisation, Database Management Systems, Design Programming, Design Thinking, Design of Networks and Distributed Systems, Digital Audio Systems, Digital Editing for Film and Video, Digital Effects for Film and Video, Graduate Internship, Graduation Studio, Laboratories, Studios, Interface Design, Internet Cultures and Governance, Lighting Design Software, Mobile Computing, Mobile Media and Games, Multimedia Design and Authoring, New Media Audiences, Recording Portfolio, Pervasive Computing.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program is the first of its kind in Australia, created to infuse technological innovation with human-centered design thinking. The graduates will explore these technologies and their potential to solve critical problems in different areas. The program promotes a creative and critical approach, within the framework of research-driven interaction design and user experience methodologies. The result is an understanding of how to design interactive products, services and systems that will have lasting cultural and commercial importance. The program offers a studio-based teaching environment in which the graduates work individually or in teams to creatively solve design challenges.

Requirements

A bachelor's degree, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

Contacts with (foreign) institutes

The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.

International students
**AUD 118,080
(or ~ USD 89,740)**
per programm

Disciplines
Architecture Design and Communication, Architecture Technology, Architecture History Introduction, Architecture Design Studios, Architecture Communications, Australian Architecture, History Western Architecture 20th Century, Architecture Portfolio and Communications, the number of elective courses.

University description
RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)
This program is the first step to becoming an architect and it develops an understanding of architecture providing the students with a diverse set of skills and learning experiences. The program's focus is the core skills required of an architect and architectural designer. The students will learn from internationally recognized and award-winning architects, alongside visiting national and international experts, consultants and specialists. The program combines experimental and speculative design with real-life industry linked projects that will help to develop an innovative approach to architecture.

Requirements
Successfully completed an Australian Year 12 (or equivalent senior secondary school) qualification, portfolio, interview.

International programmes for students of the institution
RMIT global networks give the students opportunities to enhance their education or research experience: cross-campus study to RMIT's campuses in Vietnam; semester exchanges to more than 200 partner institutions in more than 31 cities in three continents; short-term study tours and programs to Europe, Asia and the Americas; international work experience with global companies in Europe, Asia and the USA, as part of RMIT's International Industry Experience and Research Program (RIIERP). All RMIT students – both domestic and international – have the chance to participate in international experiences.

Contacts with (foreign) institutes
RMIT has partnerships with leading universities across the globe.

Animation and Interactive Media Studios, Animation and Interactive Media Design, Animation and Interactive Media Studies History, Animation and Interactive Media Design for Movement, Animation and Interactive Media Studies Futures, 2D Animation, 3D Animation, Visual Effects, Animation and Interactive Media Project Concepts, Animation and Interactive Media Major Project, 2D Animation Advanced, 3D Animation Advanced and the number of elective courses.

University description

RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)

This is one of the most popular animation programs in Victoria, where the students will become specialists in animation and interactive media design including: animation (2D and 3D), motion graphics, special effects and interactive media. This program looks at animation in all its forms, from the animated character to motion graphics across linear and interactive environments. Presented in a creative and supportive environment, the program focuses on intellectual investigation and conceptual development. Upon graduating, the students will demonstrate aesthetic and intellectual maturity and strong technical abilities within design, media and art disciplines.

Requirements

Successfully completed an Australian Year 12 (or equivalent senior secondary school) qualification, portfolio, applicant statement, interview (not necessary).

International programmes for students of the institution

RMIT global networks give the students opportunities to enhance their education or research experience: cross-campus study to RMIT's campuses in Vietnam; semester exchanges to more than 200 partner institutions in more than 31 cities in three continents; short-term study tours and programs to Europe, Asia and the Americas; international work experience with global companies in Europe, Asia and the USA, as part of RMIT's International Industry Experience and Research Program (RIIERP). RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)

The program has a strong focus on ideas-led venturous design exploration and will assist the students to develop a sophisticated understanding of architecture, while providing them with a diverse set of advanced skills and learning experiences. The students will continue to develop the core skills of architectural design learnt in the degree to an advanced level, enhance understanding of architecture and design-based research, acquire diverse skills, undertake a wide variety of learning experiences and gain critical awareness of your own work.

Requirements

Successfully completed an Australian architecture specific Bachelor degree (or equivalent overseas qualification), portfolio, personal statement, CV, English.

International programmes for students of the institution

RMIT global networks give the students opportunities to enhance their education or research experience: cross-campus study to RMIT's campuses in Vietnam; semester exchanges to more than 200 partner institutions in more than 31 cities in three continents; short-term study tours and programs to Europe, Asia and the Americas; international work experience with global companies in Europe, Asia and the USA, as part of RMIT's International Industry Experience and Research Program (RIIERP). Duration
3 years
full time

Tuition fee
International students
AUD 90,688
(or ~ USD 68,900)
per programm

Disciplines
Related Studies Painting, Related Studies Photography, Related Studies Sculpture & Spatial Prac, Related Studies Drawing & Printmedia, the number of Critical and Theoretical Studies, the number of Studio Studies

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

This program is a specialist course that will help the student to develop practical skills and theoretical knowledge in the visual arts. From the outset, its studio projects are expected to demonstrate investigation and experimentation with a range of concepts, materials, techniques and processes. The studies will culminate in a resolved body of artwork for inclusion in the Graduate Exhibition at the conclusion of the degree.

The students obtain knowledge and skills to maintain an independent artistic practice, develop confidence to undertake experimental technical/artistic approaches in developing set projects, develop understanding of topics in contemporary art criticism and aesthetic theory.

Requirements

English, Interview, Folio.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new
opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

Contacts with (foreign) institutes

The University has exchange partners universities in destinations all over the world, including Canada, Europe, USA, China.

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 96,440-134,136 (or ~ USD 73,300-101,940)** per programm	Global Foundations of Design, Foundations of Design: Representation, Construction as Alchemy, Digital Design, Modern Architecture: Momo to Pomo, Construction Analysis, Environmental Building Systems, Construction Design, Capstone: Design Studio Epsilon, Design Studios

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The program allows the student to combine the humanities, sciences and visual and performing arts within a single degree.

The Architecture major teaches students to apply design thinking, a creative, solution-focused approach, to imagine future environments for living, working and playing in our age of environmental change, rapid urbanisation, global flows of people, materials and capital and exponentially increasing digital capabilities. Design lies at the heart of the architectural process and is underpinned by an expertise in technologies for representing imagined environments in 2D and 3 D (analogue and digital), an understanding of technologies of building (structural and material systems, building science and environmental systems), and a knowledge of precedents from history (architectural, landscape and urban). Consequently, the major is hinged around a spine of design studios which are supported by a sequence of subjects that teach skills in representation, technologies, and histories of design. Students are engaged in varied learning contexts that include lectures, tutorials, digital learning environments, site visits, a fabrication workshop and a research library where ideas, skills and knowledge can be learned, shared, debated, and tested.

Requirements

English, ATAR Based admission (entry score) 85.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program provides students with a disciplinary grounding in architectural design and related technical and academic knowledge. It prepares students to work in architecture and other design-based industries. Lectures and practical sessions cover the following areas: Architectural Design, Architectural Communications, Architectural History and Theory, Architectural Science and Technology, Architectural Construction and Structures.

Requirements

ATAR score 90.6 or equivalent, English.

International programmes for students of the institution

UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

Contacts with (foreign) institutes

UNSW has formal relationships with more than 200 international partners. UNSW is a foundation member of the prestigious Universitas 21 network, an international network of leading research-intensive universities in 15 countries, which provides a global platform for student mobility and academic engagement.

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 109,440 (or ~ USD 83,170)** per programm	Media Arts Gateways, Histories of Contemporary Art, Animation (several levels), Interactive Media (several levels), Moving Image, Visual Effects, the number of elective courses.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program prepares students to thrive in a variety of media arts contexts. In a world of rapidly changing digital technologies, it recognizes the need for imaginative, informed, and critically-oriented media practitioners now and into the future. With a focus on developing skills and knowledge across a range of digital, interactive, and screen-based media, the program allows students to experiment with a variety of media technologies, platforms, and ideas. Whether working with video, sound, digital imaging, 3D modelling, animation, or interactive and immersive technologies, the students are given opportunities to explore their individual interests within a supportive and peer-oriented learning environment.

Requirements

ATAR score 75 or equivalent, English.

International programmes for students of the institution

UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

Contacts with (foreign) institutes

UNSW has formal relationships with more than 200 international partners. UNSW is a foundation member of the prestigious Universitas 21 network, an international network of leading research-intensive universities in 15 countries, which provides a global platform for student mobility and academic engagement.

50 QS World University Rankings 2018   THE (World University Rankings 2018) **61**

Duration **3 years** full time	**Tuition fee** International students **AUD 118,500*** **(or ~ USD 90,000)** per programm ** - additional course costs (books and study materials) are not included*	**Disciplines** Architectural History/Theory; Architectural Sketching and Drawing; Architectural Studio; Architectural Technologies; Architecture Professional Practice; Art Processes; Elective.

University description	The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.
Estimation of program (qualities, advantages, opportunities)	The program covers: study for design for the built environment through a studio-based program that involves working on real-world projects in and around Sydney; the students will undertake a core program in architectural history and theory, communications, technology and design workshops, get access to electives drawn from across disciplines in arts, digital design, sustainability and urban design. Each semester revolves around a studio which explores aspects of the design process relating directly to the practice of the architectural profession. The studios are supplemented by core units of study in architectural history and theory, communications, technologies and art workshops. Methods of study in the course will include studio work, lectures, seminars, field trips, and workshops.
Requirements	Secondary education qualification (NSW Higher School Certificate), English language requirements. Domestic applicants shall submit a portfolio of work in support of their application.
International programmes for students of the institution	During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).
Contacts with (foreign) institutes	The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program is the first of its kind in Australia, created to infuse technological innovation with human-centered design thinking. The graduates will explore these technologies and their potential to solve critical problems in different areas. The program promotes a creative and critical approach, within the framework of research-driven interaction design and user experience methodologies. The result is an understanding of how to design interactive products, services and systems that will have lasting cultural and commercial importance. The program offers a studio-based teaching environment in which the graduates work individually or in teams to creatively solve design challenges.

Requirements

A bachelor's degree, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

THE (World University Rankings 2018) **61**

Duration	Tuition fee	Disciplines
1,5 years full time	International students **AUD 48,000 (or ~ USD 36,500)** per programm	Introduction to Architectural Science, Audio Production, Digital Audio Systems, Architectural and Audio Acoustics, Indoor Environmental Quality, Sound Design for New Media, Audio Systems and Measurement, Building Acoustics and Noise Control, Audio and Acoustics seminar, Spatial Audio and the number of elective courses.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program will give the students a solid foundation in the design, measurement and theory of audio and acoustics. They will gain a deep understanding of how sound shapes our experience of communication, entertainment, and spatial awareness, opening up a diversity of career paths including audio production, system design and acoustic consulting. Throughout the program, the students will combine aesthetic sound design, new media, sound recording and system design with acoustic engineering, computer modelling and psychology. They will build on a foundational understanding of the broader aspects of design science (including illumination, building services, sustainable design and indoor environment quality), with access to the School of Architecture's world-class facilities. The field of Architectural Science is enjoying rapid and exciting technological innovations. Through interdisciplinary access to the university od Sydney's leading academic researchers and laboratories, the program emphasizes the knowledge and critical thinking skills that will enable students to adapt to—and lead—future changes in built environment.

Requirements

A bachelor's degree, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

Duration	Tuition fee	Disciplines
1,5 years full time	International students **AUD 48,000 (or ~ USD 36,500)** per programm	Introduction to Architectural Science, Building Construction Technology, Sustainable Building Design Principles, Daylight in Buildings, Indoor Environmental Quality, Urban Ecology, Design and Planning, Sustainable Building Design Practice, Building Energy Analysis and the number of elective courses.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program enables students to develop efficient and environmentally responsive buildings and to retrofit existing buildings to meet today's environmental demands. The students' skills in sustainable design are enhanced through the school's expertise in the built environment. The research-leading lecturers take the students on site visits and expose them to a range of international collaborators. The program provides the students with internship opportunities with leading businesses and consultancies.

Requirements

A bachelor's degree, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

3 years full time	International students **AUD 109,440 (or ~ USD 83,174)** per programm	Visual Communication: Design and Production, Contemporary Design in Context, Figure & Life, Image and Object, Hold Everything: Studio Foundation, Precise Drawing and Model Making, Art and Design Histories, Creative Data Visualization: Representing Data in Visual and Material Form, Dynamic Design and Generative Systems, Design Practices, elective courses such as Jewellery & Object: Introduction to Precise Miniature Construction, Maker, Wearer, Viewer, User, Making with machines, Craft and Design Practice-led Research.

University description	The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world. ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges. ANU counts more Nobel Laureates among staff and alumni than any other Australian university.
Estimation of program (qualities, advantages, opportunities)	The program combines cutting-edge digital practices with internationally-renowned art and craft studio disciplines. The students will benefit from deep immersion in digital, manual and theoretical studies and a wide overview of creative practices. From coding, to making, to manufacture, students apply hands-on design to digital and physical materials. Students delve into web design, data visualization, and interaction design, and experiment in studios to develop expertise in the latest digital form and fabrication processes.
Requirements	Completion of Australian Year 12 or equivalent, portfolio and interview.
International programmes for students of the institution	The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.
Contacts with (foreign) institutes	ANU deals with partner institutions in Asia, Europe, the United Kingdom, Canada and the United States of America.

University description

The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world.

ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges.

ANU counts more Nobel Laureates among staff and alumni than any other Australian university.

Estimation of program (qualities, advantages, opportunities)

The program offers the graduates the opportunity to develop and refine high-level technical and creative skills and knowledge for working with the forms, materials and technologies of a chosen studio discipline. There is an opportunity to choose a major from the following range of studio disciplines: animation and video, ceramics, furniture, glass, hybrid art practice, jewellery and object, painting, photomedia, printmedia and drawing, sculpture and spatial practice, or textiles.

Requirements

Completion of Australian Year 12 or equivalent, portfolio and interview.

International programmes for students of the institution

The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.

Disciplines
Design Studies, Architectural Media Studies, Modern Architecture and Urbanism, Introduction to Sustainability and Technology, Design Technology Studies, Rise of the City, Environmental Design Studies, Worlds of Architecture, Professional Studies, Elective.

University description	The University of Auckland is New Zealand's flagship, research-led university, known for the excellence of its teaching, its research, and its service to local, national and international communities.
Estimation of program (qualities, advantages, opportunities)	The program introduces the students to the fundamental aspects of architecture. Through studio courses, real world case studies and future-based speculation projects, the students will develop their design skills and creative practice, will have access to software used in the industry as well as fully-equipped workshops to bring the students' concepts to life.
Requirements	International Baccalaureate Diploma with a minimum total score of 24, General Certificate of Education (GCE) Advanced Level, portfolio, English.
International programmes for students of the institution	The University's 360° Auckland Abroad student exchange program enables New Zealand students to spend one or two semesters at one of the University's more than 90 tertiary exchange partners worldwide.
Contacts with (foreign) institutes	The University has a wide network of international affiliations and formal agreements with 174 universities in 40 countries.

The University of Melbourne

https://about.unimelb.edu.au/

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 90,688 (or ~ USD 68,900)** per programm	Related Studies Painting, Related Studies Photography, Related Studies Sculpture & Spatial Prac, Related Studies Drawing & Printmedia, the number of Critical and Theoretical Studies, the number of Studio Studies.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

This program is a specialist course that will help the student to develop practical skills and theoretical knowledge in the visual arts. From the outset, its studio projects are expected to demonstrate investigation and experimentation with a range of concepts, materials, techniques and processes. The studies will culminate in a resolved body of artwork for inclusion in the Graduate Exhibition at the conclusion of the degree.

The students obtain knowledge and skills to maintain an independent artistic practice, develop confidence to undertake experimental technical/artistic approaches in developing set projects, develop understanding of topics in contemporary art criticism and aesthetic theory.

Requirements

English, Interview, Folio.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

Contacts with (foreign) institutes

The University has Exchange partners universities in destinations all over the world, including Canada, Europe, USA, China.

International students
AUD 96,440-134,136 (or ~ USD 73,300-101,940)
per programm

Disciplines
Global Foundations of Design, Foundations of Design: Representation, Construction as Alchemy, Digital Design, Modern Architecture: Momo to Pomo, Construction Analysis, Environmental Building Systems, Construction Design, Capstone: Design Studio Epsilon, Design Studios.

University description	The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.
Estimation of program (qualities, advantages, opportunities)	The program allows the student to combine the humanities, sciences and visual and performing arts within a single degree. The Architecture major teaches students to apply design thinking, a creative, solution-focused approach, to imagine future environments for living, working and playing in our age of environmental change, rapid urbanisation, global flows of people, materials and capital and exponentially increasing digital capabilities. Design lies at the heart of the architectural process and is underpinned by an expertise in technologies for representing imagined environments in 2D and 3 D (analogue and digital), an understanding of technologies of building (structural and material systems, building science and environmental systems), and a knowledge of precedents from history (architectural, landscape and urban). Consequently, the major is hinged around a spine of design studios which are supported by a sequence of subjects that teach skills in representation, technologies, and histories of design. Students are engaged in varied learning contexts that include lectures, tutorials, digital learning environments, site visits, a fabrication workshop and a research library where ideas, skills and knowledge can be learned, shared, debated, and tested.
Requirements	English, ATAR Based admission (entry score) 85.
International programmes for students of the institution	The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

3 years full time	International students **AUD 123,840 (or ~ USD 94,100)** per programm	Introduction to Architecture and Enabling Skills, Architectural Design Studios, Architectural History and Theory, Architectural Communications, Architectural Science and Building Environment, Construction and Structures, Fabrication Fundamentals, Building Information Modelling, Architectural Fabrication, the number of elective courses.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program provides students with a disciplinary grounding in architectural design and related technical and academic knowledge. It prepares students to work in architecture and other design-based industries. Lectures and practical sessions cover the following areas: Architectural Design, Architectural Communications, Architectural History and Theory, Architectural Science and Technology, Architectural Construction and Structures.

Requirements

ATAR score 90.6 or equivalent, English.

International programmes for students of the institution

UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

Contacts with (foreign) institutes

UNSW has formal relationships with more than 200 international partners. UNSW is a foundation member of the prestigious Universitas 21 network, an international network of leading research-intensive universities in 15 countries, which provides a global platform for student mobility and academic engagement.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program is the nexus of architecture and design with engineering and science all through a profound understanding of computing and computation. Computers have infiltrated all aspects of the built environment. Thus, the program focuses on applying state of the art thinking in design, architecture and urbanism with theories from engineering and science together with frontier computer skills and digital fabrication technologies. The resulting creative, technical and aesthetic solutions are taught in individual interlinked modules. The program offers unique skills on the application of digital technologies in the built environment to face the challenges of the 21st century.

Requirements

ATAR score 75 or equivalent, English.

It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)
The program provides a studio based, critical, research-led education in the overarching discipline of design. The program builds on UNSW Art & Design's strengths in equipping graduates with a commitment to material quality coupled with critical idealism; it emphasizes a distinctive understanding of how design can change our societies, grounded in a deep reflection on diverse historical, social and cultural values. The graduates understand how design-led solutions assist people to perform at their best in agile and rapidly changing environments. The merging of making, criticality, technology, research, management and business provides graduates with transferable skills for careers across a range of existing and emerging design fields.

Disciplines
Architectural History/Theory; Architectural Sketching and Drawing; Architectural Studio; Architectural Technologies; Architecture Professional Practice; Art Processes; Elective.

University description	The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.
Estimation of program (qualities, advantages, opportunities)	The program covers: study for design for the built environment through a studio-based program that involves working on real-world projects in and around Sydney; the students will undertake a core program in architectural history and theory, communications, technology and design workshops, get access to electives drawn from across disciplines in arts, digital design, sustainability and urban design. Each semester revolves around a studio which explores aspects of the design process relating directly to the practice of the architectural profession. The studios are supplemented by core units of study in architectural history and theory, communications, technologies and art workshops. Methods of study in the course will include studio work, lectures, seminars, field trips, and workshops.
Requirements	Secondary education qualification (NSW Higher School Certificate), English language requirements. Domestic applicants shall submit a portfolio of work in support of their application.
International programmes for students of the institution	During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).
Contacts with (foreign) institutes	The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program is the first of its kind in Australia, created to infuse technological innovation with human-centered design thinking. The graduates will explore these technologies and their potential to solve critical problems in different areas. The program promotes a creative and critical approach, within the framework of research-driven interaction design and user experience methodologies. The result is an understanding of how to design interactive products, services and systems that will have lasting cultural and commercial importance. The program offers a studio-based teaching environment in which the graduates work individually or in teams to creatively solve design challenges.

Requirements

Bachelor's degree, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

20 QS World University Rankings 2018   THE (World University Rankings 2018) **48**

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 109,440 (or ~ USD 83,174)** per programm	Visual Communication: Design and Production, Contemporary Design in Context, Figure & Life, Image and Object, Hold Everything: Studio Foundation, Precise Drawing and Model Making, Art and Design Histories, Creative Data Visualization: Representing Data in Visual and Material Form, Dynamic Design and Generative Systems, Design Practices, elective courses such as Jewellery & Object: Introduction to Precise Miniature Construction, Maker, Wearer, Viewer, User, Making with machines, Craft and Design Practice-led Research.

University description

The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world.

ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges.

ANU counts more Nobel Laureates among staff and alumni than any other Australian university.

Estimation of program (qualities, advantages, opportunities)

The program combines cutting-edge digital practices with internationally-renowned art and craft studio disciplines.

The students will benefit from deep immersion in digital, manual and theoretical studies and a wide overview of creative practices. From coding, to making, to manufacture, students apply hands-on design to digital and physical materials. Students delve into web design, data visualization, and interaction design, and experiment in studios to develop expertise in the latest digital form and fabrication processes.

Requirements

Completion of Australian Year 12 or equivalent, portfolio and interview.

International programmes for students of the institution

The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.

Contacts with (foreign) institutes

ANU deals with partner institutions in Asia, Europe, the United Kingdom, Canada and the United States of America.

University description

Queensland University of Technology (QUT) is a major Australian university with a global outlook and a real-world focus, it has close links with industry and its relevant teaching and applied research. Industry representatives and professionals contribute to QUT course development, adding a practical perspective to theoretical education. QUT academic staff consult in industry and work on industry projects which often involve students. Staff and students have access to the latest teaching technology.

Estimation of program (qualities, advantages, opportunities)

The program provides industry-standard facilities. The students will be advised by leading industry mentors, and embrace the challenges and opportunities of twenty-first century fashion including ethics and sustainability, industry practices and emerging digital technologies. In the studio, the students will develop your design identity, working individually and in teams on real-world briefs and projects.

Requirements

Completed Australian Year 12, or equivalent qualification, portfolio, English.

International programmes for students of the institution

The outbound Student Exchange program offers students the opportunity to study for one or two semesters at an overseas partner institution and earn credits towards their QUT degree.QUT has exchange agreements with more than 200 partner institutions in 43 countries across the world.

Contacts with (foreign) institutes

QUT international partner institutions and exchange destinations include: Africa, Asia, Europe, North and Central America, South America.

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 102,900 (or ~ USD 78,200)** per programm	Visual Communication Design, Impact Labs (Place, People, Planet, Purpose), Introducing Design Fabrication, Design Visualizations, Image Design and Production, Emerging Design Technology, Design Consequences, Typographic Design, Visual Narrative Design, Theories and Methods of Visual Communication, Motion Design, Data Visualization and Information Design, Experimental Visual Communication, Furniture Design and Fabrication, Web Prototyping, Advanced Computer-Aided Design, Elective.

University description

Queensland University of Technology (QUT) is a major Australian university with a global outlook and a real-world focus, it has close links with industry and its relevant teaching and applied research. Industry representatives and professionals contribute to QUT course development, adding a practical perspective to theoretical education. QUT academic staff consult in industry and work on industry projects which often involve students. Staff and students have access to the latest teaching technology.

Estimation of program (qualities, advantages, opportunities)

The program will develop both practical and theoretical skills in multiple visual communication design specializations including graphic design, typography, image making, information design, experience design, motion design, branding and interaction design. Build the students expertise in professional studio settings with a focus on both contemporary and emerging design practices, through real-world design projects, a culture of designing for public exhibition, ongoing industry engagement, and a strong foundation of creative experimentation and innovative conceptual thinking.

Requirements

Completed Australian Year 12, or equivalent qualification, English.

247 QS World University Rankings 2018   THE (World University Rankings 2018) **401–500**

Duration
3 years
full time

Tuition fee
International students
**AUD 92,160
(or ~ USD 70,040)**
per programm

Disciplines
Fine Art Studios, Workshops, History+Theory+Cultures, Art Enterprise Workshops and the number of elective courses.

University description
RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)
The program makes students immersed in fine art studios, where they gain the confidence and the tools to understand and interpret the world around you through art. Studio courses are taught by high-profile practicing artists who exhibit locally and internationally, so the students can connect with what's happening in the art world. The students will receive personal mentoring that challenges and pushes them to discover and form their own art practice or specialization. RMIT has a structure that allows breadth through multidisciplinary studio access, but also allowing to focus on a particular craft (ceramics, gold and silversmithing, sculpture, video, drawing, painting, print).

Requirements
Successfully completed an Australian Year 12 (or equivalent senior secondary school) qualification, portfolio, interview.

International programmes for students of the institution
RMIT global networks give the students opportunities to enhance their education or research experience: cross-campus study to RMIT's campuses in Vietnam; semester exchanges to more than 200 partner institutions in more than 31 cities in three continents; short-term study tours and programs to Europe, Asia and the Americas; international work experience with global companies in Europe, Asia and the USA, as part of RMIT's International Industry Experience and Research Program (RIIERP). All RMIT students – both domestic and international – have the chance to participate in international experiences.

Contacts with (foreign) institutes
RMIT has partnerships with leading universities across the globe.

University description

RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)

The program offers a distinguished professional education, this program is accredited by the Australian Institute of Landscape Architects (AILA). The program is recognized as a world-class facility in fostering design knowledge, critical thinking, and design advocacy through innovative teaching and research. The program will equip the students to become a leader and innovator in Landscape Architectural practice.
Design research projects undertaken within this program sit at a contemporary and international level. Studios are led by distinguished local and international academic practitioners drawing from a diverse field of knowledge and experience.

Requirements

Successfully completed an Australian Bachelor degree (or equivalent overseas qualification) in architectural design, landscape architecture or an related design field, portfolio, CV, English.

International programmes for students of the institution

RMIT global networks give the students opportunities to enhance their education or research experience: cross-campus study to RMIT's campuses in Vietnam; semester exchanges to more than 200 partner institutions in more than 31 cities in three continents; short-term study tours and programs to Europe, Asia and the Americas; international work experience with global companies in Europe, Asia and the USA, as part of RMIT's International Industry Experience and Research Program (RIIERP). University description

RMIT is a global university of technology, design and enterprise in which teaching, research and engagement are central to making an impact and creating life-changing experiences for our students. RMIT is a world leader in Art and Design; Architecture; Education; Engineering; Development; Computer Science and Information Systems; Business and Management; and Communication and Media Studies.

Estimation of program (qualities, advantages, opportunities)

The program allows the students to push their design practice into new areas by broadening your horizons and embracing new ideas. The program centered on learning through design studios, which make up the majority of this program and are taught in small groups. Studios provide a unique way of exploring ideas by challenging future designers and run by academics and practicing design leaders from local and international architectural and design firms.
This program has strong industry links that allows students to connect with local and global leaders in the architecture, design, engineering and technology industries.

Requirements

Successfully completed an Australian Bachelor degree (or equivalent overseas qualification), personal statement, CV, English.

International programmes for students of the institution

41 QS World University Rankings 2018 THE (World University Rankings 2018) **32**

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 129,631 (or ~ USD 98,520)** per programm	Shaping the Landscape, Plants in the Landscape, Performative Ecologies, History of Landscape Architecture, Contemporary Landscape Theory, Landscape Detail Design, Constructed Ecologies, Landscape Studios: Design Techniques, Site and Design, Speculations, Strategies, Sustainable Urbanism, Landscape Practice, Landscape Architecture Design Thesis and the number of Elective courses.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The program provides the graduates with a strong grounding in ecology and urbanism. This knowledge will be complemented by in-depth study of history and theory encompassing: contemporary landscape architecture, urban design theory, cross-cultural perspectives of space and cities, history of landscape architecture and architecture. The dominant mode of teaching and learning is through design studios supplemented by specialist landscape architecture subjects and electives from related built environment disciplines.

Requirements

·A minimum three-year undergraduate degree with a landscape architecture major with a weighted average of at least 65%, or equivalent to the University of Melbourne grading scheme.
·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program.
·A design portfolio.
·English.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new
opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

Contacts with (foreign) institutes

The University has exchange partners universities in destinations all over the world, including Canada, Europe, USA, China.

Architectural Communications, Computational Design (Fundamentals, Intermediate, Advanced), Design Computing, Computational Design Theory, Building Information Modelling, Urban Data, Ubiquitous Cities, Building Data, Design Information Management, Advanced Digital Fabrication, Human Machine Interaction, Graduation Project: Practice, Graduation Project: Theory, Digital Collaboration Studio, the number of elective courses.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program is the nexus of architecture and design with engineering and science all through a profound understanding of computing and computation. Computers have infiltrated all aspects of the built environment. Thus, the program focuses on applying state of the art thinking in design, architecture and urbanism with theories from engineering and science together with frontier computer skills and digital fabrication technologies. The resulting creative, technical and aesthetic solutions are taught in individual interlinked modules. The program offers unique skills on the application of digital technologies in the built environment to face the challenges of the 21st century.

Requirements

ATAR score 75 or equivalent, English.

International programmes for students of the institution

UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

Contacts with (foreign) institutes

UNSW has formal relationships with more than 200 international partners. UNSW is a foundation member of the prestigious Universitas 21 network, an international network of leading research-intensive universities in 15 countries, which provides a global platform for student mobility and academic engagement.

Disciplines
Architectural History/Theory; Architectural Sketching and Drawing; Architectural Studio; Architectural Technologies; Architecture Professional Practice; Art Processes; Elective.

University description	The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.
Estimation of program (qualities, advantages, opportunities)	The program covers: study for design for the built environment through a studio-based program that involves working on real-world projects in and around Sydney; the students will undertake a core program in architectural history and theory, communications, technology and design workshops, get access to electives drawn from across disciplines in arts, digital design, sustainability and urban design. Each semester revolves around a studio which explores aspects of the design process relating directly to the practice of the architectural profession. The studios are supplemented by core units of study in architectural history and theory, communications, technologies and art workshops. Methods of study in the course will include studio work, lectures, seminars, field trips, and workshops.
Requirements	Secondary education qualification (NSW Higher School Certificate), English language requirements. Domestic applicants shall submit a portfolio of work in support of their application.
International programmes for students of the institution	During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).
Contacts with (foreign) institutes	The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.

Disciplines
Visual Communication: Design and Production, Contemporary Design in Context, Figure & Life, Image and Object, Hold Everything: Studio Foundation, Precise Drawing and Model Making, Art and Design Histories, Creative Data Visualization: Representing Data in Visual and Material Form, Dynamic Design and Generative Systems, Design Practices, elective courses such as Jewellery & Object: Introduction to Precise Miniature Construction, Maker, Wearer, Viewer, User, Making with machines, Craft and Design Practice-led Research.

University description	The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world. ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges. ANU counts more Nobel Laureates among staff and alumni than any other Australian university.
Estimation of program (qualities, advantages, opportunities)	The program combines cutting-edge digital practices with internationally-renowned art and craft studio disciplines. The students will benefit from deep immersion in digital, manual and theoretical studies and a wide overview of creative practices. From coding, to making, to manufacture, students apply hands-on design to digital and physical materials. Students delve into web design, data visualization, and interaction design, and experiment in studios to develop expertise in the latest digital form and fabrication processes.
Requirements	Completion of Australian Year 12 or equivalent, portfolio and interview.
International programmes for students of the institution	The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.
Contacts with (foreign) institutes	ANU deals with partner institutions in Asia, Europe, the United Kingdom, Canada and the United States of America.

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 112,500 (or ~ USD 85,500)** per programm	Foundation studios, Architecture design studios, Technologies and environments studies, Integrated technologies environments and professional studies, Introduction to visual culture in art, design and architecture, Contemporary architecture, 19th and 20th Century architecture, Architecture and the city, Architecture communications studies, Introduction to art and design health and safety, the number of elective courses.

University description
Monash university is Australia's largest university (with approximately 60,000 students from over 170 countries). It continues to lead and collaborate with teams around the world, conducts research across numerous fields of study. The University has a strong teaching team with some of the best academics in the world and professional staff who provide the students with wide range of theoretical knowledge and practical skills.

Estimation of program (qualities, advantages, opportunities)
Creativity is the cornerstone of the program. Central to the course is the design studio where the students will investigate ideas and experiment with design processes, mentored by academics and architects from around the world. They will construct models and build full scales structures, both in class and in the community and experiment with diverse materials in our glass, woodwork and metal studios.

Requirements
Successful completion Australian Year 12 or equivalent, English.

International programmes for students of the institution
Monash University has student exchange agreements with over 160 partner universities in more than 35 countries across the UK, Europe, the Americas, the Middle East, Oceania and Asia. The students can study a semester or two at a foreign partner university.

Contacts with (foreign) institutes
Monash University has close contacts with a large number of foreign universities from Europe, the Americas, Asia and the Middle East.

University description	The University of Auckland is New Zealand's flagship, research-led university, known for the excellence of its teaching, its research, and its service to local, national and international communities.
Estimation of program (qualities, advantages, opportunities)	The program introduces the students to the fundamental aspects of architecture. Through studio courses, real world case studies and future-based speculation projects, the students will develop their design skills and creative practice, will have access to software used in the industry as well as fully-equipped workshops to bring the students' concepts to life.
Requirements	International Baccalaureate Diploma with a minimum total score of 24, General Certificate of Education (GCE) Advanced Level, portfolio, English.
International programmes for students of the institution	The University's 360° Auckland Abroad student exchange program enables New Zealand students to spend one or two semesters at one of the University's more than 90 tertiary exchange partners worldwide.
Contacts with (foreign) institutes	The University has a wide network of international affiliations and formal agreements with 174 universities in 40 countries.

41 QS World University Rankings 2018   THE (World University Rankings 2018) **32**

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 96,440-134,136 (or ~ USD 73,300-101,940)** per programm	Global Foundations of Design, Foundations of Design: Representation, Construction as Alchemy, Digital Design, Modern Architecture: Momo to Pomo, Construction Analysis, Environmental Building Systems, Construction Design, Capstone: Design Studio Epsilon, Design Studios.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The program allows the student to combine the humanities, sciences and visual and performing arts within a single degree.

The Architecture major teaches students to apply design thinking, a creative, solution-focused approach, to imagine future environments for living, working and playing in our age of environmental change, rapid urbanisation, global flows of people, materials and capital and exponentially increasing digital capabilities. Design lies at the heart of the architectural process and is underpinned by an expertise in technologies for representing imagined environments in 2D and 3 D (analogue and digital), an understanding of technologies of building (structural and material systems, building science and environmental systems), and a knowledge of precedents from history (architectural, landscape and urban). Consequently, the major is hinged around a spine of design studios which are supported by a sequence of subjects that teach skills in representation, technologies, and histories of design. Students are engaged in varied learning contexts that include lectures, tutorials, digital learning environments, site visits, a fabrication workshop and a research library where ideas, skills and knowledge can be learned, shared, debated, and tested.

Requirements

English, ATAR Based admission (entry score) 85.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

Contacts with (foreign) institutes

The University has Exchange partners universities in destinations all over the world, including Canada, Europe, USA, China.

41 QS World University Rankings 2018　　　THE (World University Rankings 2018) **32**

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 129,631 (or ~ USD 98,520)** per programm	Architectural Technology, Applied Architectural Technology, Architectural Cultures: Modernism, After Modernism, Construction Methods, Twenty-first Century Architecture, the number of Architecture Studios, Architectural Practice, Design Thesis and the number of elective courses.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The Master of Architecture is a professional program which prepares graduates for employment as architects. The program incorporates research-led teaching, problem-based collaborative learning, professional engagement, and a diverse mature cohort. It combines art, science and technology with business, social and environmental concerns.

The program provides graduates with design skills that will contribute to the improvement of built environment, a grounding in the rich lessons of architectural history, theory and technology enabling them to develop innovative architecture, relevant to time and place, people and culture, the skills to manage an architectural practice and work within teams, the ability to use resources, materials and technologies to produce responsible and sustainable architecture.

Requirements

·An undergraduate degree with a major in architecture or architectural studies with a weighted average of at least 65% or equivalent to the University of Melbourne grading scheme.
·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program.
·A design portfolio.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new
opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program provides students with a disciplinary grounding in architectural design and related technical and academic knowledge. It prepares students to work in architecture and other design-based industries. Lectures and practical sessions cover the following areas: Architectural Design, Architectural Communications, Architectural History and Theory, Architectural Science and Technology, Architectural Construction and Structures.

Requirements

ATAR score 90.6 or equivalent, English.

International programmes for students of the institution

UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

Contacts with (foreign) institutes

UNSW has formal relationships with more than 200 international partners. UNSW is a foundation member of the prestigious Universitas 21 network, an international network of leading research-intensive universities in 15 countries, which provides a global platform for student mobility and academic engagement.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program provides a studio based, critical, research-led education in the overarching discipline of design. The program builds on UNSW Art & Design's strengths in equipping graduates with a commitment to material quality coupled with critical idealism; it emphasizes a distinctive understanding of how design can change our societies, grounded in a deep reflection on diverse historical, social and cultural values. The graduates understand how design-led solutions assist people to perform at their best in agile and rapidly changing environments. The merging of making, criticality, technology, research, management and business provides graduates with transferable skills for careers across a range of existing and emerging design fields.

Requirements

ATAR score 75 or equivalent, English.

Duration
2 years
full time

Tuition fee
International students
**AUD 77,050
(or ~ USD 58,500)**
per programm

Disciplines
Contemporary Architecture Theory & Practice, Building Futures: Advanced Structures and Software, Architectural Practice (Business Management, Project Management), Advanced Architectural Design (Institutions and Ideology, Landscapes and Architecture, Utopian Urbanism, Adaptive Capacities), Architectural Research (Environment and Sustainability, Materials and Making, Design Processes, History), Elective.

University description
The University of Queensland (UQ) is one of Australia's leading research and teaching institutions. UQ has a strong focus on teaching excellence, having won more Australian Awards for University Teaching than any other in the country and attracting the majority of Queensland's highest academic achievers, as well as top interstate and overseas students. It also offers significant support to higher degree by research (HDR) students through a broad range of scholarships and research travel awards, dedicated office spaces, skills training, and professional development opportunities.

Estimation of program (qualities, advantages, opportunities)
The program allows to choose from a range of courses that will develop the students' ideas about, and abilities in, contemporary architectural practice. Courses cover topics such as housing and density, civic buildings and public space, and commercial architecture. The program encourages students to explore and develop their independence and curiosity, brings together professional architects and leading researchers who have strong local industry links and work to advance the discipline of architecture internationally. UQ offer dedicated 24/7 design studios for students. The studios are the principal learning space for students, alongside the workshop, and fabrication and computer labs for testing your ideas and developing your designs.

Requirements
Bachelor of Architectural Design from UQ or degree equivalent to a standard Australian bachelor degree in Architecture with a GPA of at least 4.5 on a 7 point scale or portfolio, English.

International programmes for students of the institution
UQ has over 180 exchange partner universities in 41 countries (Europe, Asia, Africa, North America). Student participate in exchange programs to get global experience, develop their professional and personal skills.

Contacts with (foreign) institutes
UQ has close relationships with a large number of foreign universities, participating in exchange programs and research programs.

University description
The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)
The program provides the graduates with a comprehensive understanding of the relationship between architects, urban planners, urban designers, heritage conservationists, property developers, engineers, construction managers and other built environment professionals. The graduates learn the latest techniques through intensive practical, laboratory and studio-based classes. It covers the full range of the faculty's disciplines and laboratories which include 3D laser cutting, digital fabrication and modelling facilities. Studies will also cover best practice construction techniques, structural principles and building material properties.

Requirements
ATAR score 85, English.

International programmes for students of the institution
During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

Contacts with (foreign) institutes
The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program brings together the myriad streams of environmental performance, building economics and indoor environmental quality. The High Performance Buildings stream integrates the various components of the built environment, namely Architectural and Building Services (design and operations), passive and active Sustainability, strategic and operational Facility Management and Property Economics (highlighting return on investment principles). The students will have the opportunity to not only learn but also actively participate in research as part of your studies.

Requirements

Bachelor's degree, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program develops specialized knowledge in environmental design and strategic planning for well-structured cities, including the sustainable management of towns and cities. This program focuses on developing an understanding of the ways that cities and sites are constructed physically, socially and environmentally. It develops the professional communication skills, reasoning and analytical processes required to make valuable contributions to the policy, technical and regulatory aspects of urban and regional planning. The teaching curriculum covers both Australian and international contexts.

Requirements

A bachelor's degree in human geography, design or related field, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

University description

The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world.
ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges.
ANU counts more Nobel Laureates among staff and alumni than any other Australian university.

Estimation of program (qualities, advantages, opportunities)

The program focuses on developing the graduates' creativity and practical skills. It offers a mixture of practical and theoretical courses in key areas of digital media such as, 3D and 2D computer animation, digital visual effects, digital video, digital compositing, interactivity, coding, site-specific projection, on-line design, virtual reality, sound, and hybrid media. The students will have access to the facilities at the ANU School of Art & Design, and be able to develop their own individual and collaborative projects in the context of other researchers at the ANU.

Requirements

Australian Qualifications Framework (AQF) qualifications or international equivalents with a minimum GPA of 6/7, English.

International programmes for students of the institution

The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.

Contacts with (foreign) institutes

ANU deals with partner institutions in Asia, Europe, the United Kingdom, Canada and the United States of America.

University description

The Australian National University (ANU) is a world-renowned research-intensive university, it is consistently ranked among the best universities in the world.
ANU is Australia's only member of the International Alliance of Research Universities (IARU). The alliance of leading research and teaching institutions shares a global vision, with a focus on research-led teaching, educating future leaders and tackling some of this century's biggest challenges.
ANU counts more Nobel Laureates among staff and alumni than any other Australian university.

Estimation of program (qualities, advantages, opportunities)

The program enables students to develop digital literacy and material knowledge to become enterprising professionals across diverse design disciplines. This unique program provides contemporary design education by focusing on cutting-edge practice at the intersection of material and digital domains. A flexible structure allows students to bring together digital and material practices, in ways that broaden and deepen their skills, knowledge and design agility. Engagement and innovation are program foundations. Students will collaborate with expert teaching staff, industry, and public audiences to gain real world experience and develop versatile design expertise.

Requirements

A Bachelor degree or international equivalent with a minimum GPA of 5.0/7.0., portfolio, English.

International programmes for students of the institution

The Australian National University provide its students with exchange opportunity with one of around 170 partner universities across 35 countries or take advantage of some exclusive opportunities to travel and study overseas only available at ANU like - IARU Global Summer Program, Year in Asia Program, PRIMO First Year Learning Abroad Program.

Contacts with (foreign) institutes

ANU deals with partner institutions in Asia, Europe, the United Kingdom, Canada and the United States of America.

THE (World University Rankings 2018) **80**

| **Duration** **3 years** full time | **Tuition fee** International students **AUD 112,500 (or ~ USD 85,500)** per programme | **Disciplines** Transition Studios, Contemporary architecture, Architecture and the city, Technologies and environments, Advanced architecture projects, Advanced architecture studies, Final architecture project, Integrated project - technologies, environments and professional practices, Professional practices, the number of elective courses. |

University description

Monash university is Australia's largest university (with approximately 60,000 students from over 170 countries). It continues to lead and collaborate with teams around the world, conducts research across numerous fields of study. The University has a strong teaching team with some of the best academics in the world and professional staff who provide the students with wide range of theoretical knowledge and practical skills.

Estimation of program (qualities, advantages, opportunities)

The students under the program will be trained as an integrated urban professional, with vision to design progressive architecture that responds to the dynamic needs of contemporary society and speculates about the future of our built environment. The students will undertake high-level study in specialized areas of architecture, from housing and urban design to digital practices, they will gain exposure to leading design practices through project-based design studios.

Requirements

3 years full-time, requires an Australian undergraduate degree (or equivalent) with at least credit (60%) average, portfolio, CV, interview may be required, English.

International programmes for students of the institution

Monash University has student exchange agreements with over 160 partner universities in more than 35 countries across the UK, Europe, the Americas, the Middle East, Oceania and Asia. The students can study a semester or two at a foreign partner university.

Contacts with (foreign) institutes

Monash University has close contacts with a large number of foreign universities from Europe, the Americas, Asia and the Middle East.

THE (World University Rankings 2018) **80**

Duration
2 years
full time

Tuition fee
International students
**AUD 67,200
(or ~ USD 51,100)**
per programme

Disciplines
Design thinking approaches, Design fundamental studio, Design technologies and processes, Introduction to art and design health and safety, Design research methods, 3D modelling and virtual space, Multimedia design studies, Design management and entrepreneurship, Exegesis, Elective.

University description
Monash university is Australia's largest university (with approximately 60,000 students from over 170 countries). It continues to lead and collaborate with teams around the world, conducts research across numerous fields of study. The University has a strong teaching team with some of the best academics in the world and professional staff who provide the students with wide range of theoretical knowledge and practical skills.

Estimation of program (qualities, advantages, opportunities)
The program develops the students' skills in digital communication environments. This includes designing for the web; motion and animation; and interactive touchscreen devices and surfaces. Emphasizing an advanced knowledge of existing and emerging digital design processes and systems, this program embraces projects of varied scale, from hand-held smart devices to large public interactive screens. It develops the students' ability to build a communication narrative; use multimedia processes to fill community and business needs; and understand the end-user's engagement with projects or products such as websites, apps and other screen-based media.

Requirements
Bachelor's degree in any field, English.

International programmes for students of the institution
Monash University has student exchange agreements with over 160 partner universities in more than 35 countries across the UK, Europe, the Americas, the Middle East, Oceania and Asia. The students can study a semester or two at a foreign partner university.

41 QS EECA University Rankings

THE (World University Rankings 2018) **32**

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 90,688 (or ~ USD 68,900)** per programme	Related Studies Painting, Related Studies Photography, Related Studies Sculpture & Spatial Prac, Related Studies Drawing & Printmedia, the number of Critical and Theoretical Studies, the number of Studio Studies.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

This program is a specialist course that will help the student to develop practical skills and theoretical knowledge in the visual arts. From the outset, its studio projects are expected to demonstrate investigation and experimentation with a range of concepts, materials, techniques and processes. The studies will culminate in a resolved body of artwork for inclusion in the Graduate Exhibition at the conclusion of the degree.

The students obtain knowledge and skills to maintain an independent artistic practice, develop confidence to undertake experimental technical/artistic approaches in developing set projects, develop understanding of topics in contemporary art criticism and aesthetic theory.

Requirements

English, Interview, Folio.

International programmes for students of the institution

The University has approximately 180 exchange partners in 39 countries around the world. During 2017, there were explored new
opportunities for student mobility with leading global universities (with a focus on ARWU-ranked top 50 universities).

Contacts with (foreign) institutes

The University has exchange partners universities in destinations all over the world, including Canada, Europe, USA, China.

THE (World University Rankings 2018) **32**

Duration	Tuition fee	Disciplines
3 years full time	International students **AUD 96,440-134,136 (or ~ USD 73,300-101,940)** per programme	Global Foundations of Design, Foundations of Design: Representation, Construction as Alchemy, Digital Design, Modern Architecture: Momo to Pomo, Construction Analysis, Environmental Building Systems, Construction Design, Capstone: Design Studio Epsilon, Design Studios.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The program allows the student to combine the humanities, sciences and visual and performing arts within a single degree.

The Architecture major teaches students to apply design thinking, a creative, solution-focused approach, to imagine future environments for living, working and playing in our age of environmental change, rapid urbanisation, global flows of people, materials and capital and exponentially increasing digital capabilities. Design lies at the heart of the architectural process and is underpinned by an expertise in technologies for representing imagined environments in 2D and 3 D (analogue and digital), an understanding of technologies of building (structural and material systems, building science and environmental systems), and a knowledge of precedents from history (architectural, landscape and urban). Consequently, the major is hinged around a spine of design studios which are supported by a sequence of subjects that teach skills in representation, technologies, and histories of design. Students are engaged in varied learning contexts that include lectures, tutorials, digital learning environments, site visits, a fabrication workshop and a research library where ideas, skills and knowledge can be learned, shared, debated, and tested.

Requirements

English, ATAR Based admission (entry score) 85.

International programmes for students of the institution

University description
The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)
The Master of Architecture is a professional program which prepares graduates for employment as architects. The program incorporates research-led teaching, problem-based collaborative learning, professional engagement, and a diverse mature cohort. It combines art, science and technology with business, social and environmental concerns.
The program provides graduates with design skills that will contribute to the improvement of built environment, a grounding in the rich lessons of architectural history, theory and technology enabling them to develop innovative architecture, relevant to time and place, people and culture, the skills to manage an architectural practice and work within teams, the ability to use resources, materials and technologies to produce responsible and sustainable architecture.

Requirements
·An undergraduate degree with a major in architecture or architectural studies with a weighted average of at least 65% or equivalent to the University of Melbourne grading scheme.
·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program.
·A design portfolio.

International programmes for students of the institution

3 years full time	International students **AUD 129,631 (or ~ USD 98,520)** per programme	Shaping the Landscape, Plants in the Landscape, Performative Ecologies, History of Landscape Architecture, Contemporary Landscape Theory, Landscape Detail Design, Constructed Ecologies, Landscape Studios: Design Techniques, Site and Design, Speculations, Strategies, Sustainable Urbanism, Landscape Practice, Landscape Architecture Design Thesis and the number of Elective courses.

University description

The University of Melbourne is ranked number one in Australia, its academics include business leaders, Nobel Laureates and Rhodes Scholars. The University continues to enhance teaching, learning and assessment through new curriculum design and digital innovation. The University is also one of the largest and most productive research organizations in Australia.

Estimation of program (qualities, advantages, opportunities)

The program provides the graduates with a strong grounding in ecology and urbanism. This knowledge will be complemented by in-depth study of history and theory encompassing: contemporary landscape architecture, urban design theory, cross-cultural perspectives of space and cities, history of landscape architecture and architecture. The dominant mode of teaching and learning is through design studios supplemented by specialist landscape architecture subjects and electives from related built environment disciplines.

Requirements

·A minimum three-year undergraduate degree with a landscape architecture major with a weighted average of at least 65%, or equivalent to the University of Melbourne grading scheme.
·A personal statement of up to 500 words outlining relevant prior study and work experience, and motivation to undertake the program.
·A design portfolio.
·English.

University description

The University of New South Wales (UNSW) is one of Australia's leading research and teaching universities. It offers an extensive range of undergraduate, postgraduate and research programs designed by outstanding teachers and researchers. With extensive international links, close relationships with business and industry, and state-of-the-art facilities, students receive a worldclass education.

Estimation of program (qualities, advantages, opportunities)

The program provides students with a disciplinary grounding in architectural design and related technical and academic knowledge. It prepares students to work in architecture and other design-based industries. Lectures and practical sessions cover the following areas: Architectural Design, Architectural Communications, Architectural History and Theory, Architectural Science and Technology, Architectural Construction and Structures.

Requirements

ATAR score 90.6 or equivalent, English.

International programmes for students of the institution

UNSW signed its first student exchange agreement with UCLA in 1985 and now offers exchange opportunities at 221 universities, in 32 countries.

Contacts with (foreign) institutes

UNSW has formal relationships with more than 200 international partners. UNSW is a foundation member of the prestigious Universitas 21 network, an international network of leading research-intensive universities in 15 countries, which provides a global platform for student mobility and academic engagement.

University description	The University of Queensland (UQ) is one of Australia's leading research and teaching institutions. UQ has a strong focus on teaching excellence, having won more Australian Awards for University Teaching than any other in the country and attracting the majority of Queensland's highest academic achievers, as well as top interstate and overseas students. It also offers significant support to higher degree by research (HDR) students through a broad range of scholarships and research travel awards, dedicated office spaces, skills training, and professional development opportunities.
Estimation of program (qualities, advantages, opportunities)	The program is taught by leading academics and researchers at one of the top three architecture schools in Australia. The program has studio-based format, which provide the students with opportunities to develop special areas of interest. They might collaborate with industry, research solutions to design problems, meet real clients, or visit projects. Learn to design in response to climate and context, from lecturers with strong local industry links and an international perspective. The students will study design principles, sustainability, emerging technologies, the history of buildings and culture, and more.
Requirements	Queensland Year 12 or equivalent, English.
International programmes for students of the institution	UQ has over 180 exchange partner universities in 41 countries (Europe, Asia, Africa, North America). Student participate in exchange programs to get global experience, develop their professional and personal skills.
Contacts with (foreign) institutes	UQ has close relationships with a large number of foreign universities, participating in exchange programs and research programs.

Duration	**Tuition fee**	**Disciplines**
3 years full time	International students **AUD 118,500 (or ~ USD 90,000)** per programme	Architectural History/Theory; Architectural Sketching and Drawing; Architectural Studio; Architectural Technologies; Architecture Professional Practice; Art Processes; Elective.

University description	The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.
Estimation of program (qualities, advantages, opportunities)	The program covers: study for design for the built environment through a studio-based program that involves working on real-world projects in and around Sydney; the students will undertake a core program in architectural history and theory, communications, technology and design workshops, get access to electives drawn from across disciplines in arts, digital design, sustainability and urban design. Each semester revolves around a studio which explores aspects of the design process relating directly to the practice of the architectural profession. The studios are supplemented by core units of study in architectural history and theory, communications, technologies and art workshops. Methods of study in the course will include studio work, lectures, seminars, field trips, and workshops.
Requirements	Secondary education qualification (NSW Higher School Certificate), English language requirements. Domestic applicants shall submit a portfolio of work in support of their application.
International programmes for students of the institution	During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).
Contacts with (foreign) institutes	The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program is the first of its kind in Australia, created to infuse technological innovation with human-centered design thinking. This program offers students of Interaction Design and Electronic Arts an added specialization in Illumination Design. Technology is becoming closely interwoven into everyday life. The IDEA program promotes a creative and critical approach, within the framework of research-driven interaction design and user experience methodologies. The result is an understanding of how to design interactive products, services and systems that will have lasting cultural and commercial importance. The students will learn to design across multiple platforms and scales - from natural, tangible and wearable user interfaces to interactive architecture, creative robotics and urban informatics.

Requirements

A bachelor's degree, English.

International programmes for students of the institution

During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).

Introduction to Architectural Science, Audio Production, Digital Audio Systems, Architectural and Audio Acoustics, Indoor Environmental Quality, Sound Design for New Media, Audio Systems and Measurement, Building Acoustics and Noise Control, Audio and Acoustics seminar, Spatial Audio and the number of elective courses.

University description

The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.

Estimation of program (qualities, advantages, opportunities)

The program will give the students a solid foundation in the design, measurement and theory of audio and acoustics. They will gain a deep understanding of how sound shapes our experience of communication, entertainment, and spatial awareness, opening up a diversity of career paths including audio production, system design and acoustic consulting. Throughout the program, the students will combine aesthetic sound design, new media, sound recording and system design with acoustic engineering, computer modelling and psychology. They will build on a foundational understanding of the broader aspects of design science (including illumination, building services, sustainable design and indoor environment quality), with access to the School of Architecture's world-class facilities. The field of Architectural Science is enjoying rapid and exciting technological innovations. Through interdisciplinary access to the university od Sydney's leading academic researchers and laboratories, the program emphasizes the knowledge and critical thinking skills that will enable students to adapt to—and lead—future changes in built environment.

Requirements

A bachelor's degree, English.

50 QS EECA University Rankings   THE (World University Rankings 2018) **61**

Duration	Tuition fee	Disciplines
1,5 years full time	International students **AUD 48,000 (or ~ USD 36,500)** per programme	Introduction to Architectural Science, Building Construction Technology, Sustainable Building Design Principles, Daylight in Buildings, Indoor Environmental Quality, Urban Ecology, Design and Planning, Sustainable Building Design Practice, Building Energy Analysis and the number of elective courses.

University description	The University of Sydney is one of the world's leading, comprehensive research and teaching universities. The University of Sydney School of Architecture, Design and Planning is large enough to attract world-renowned researchers and teachers, yet small enough to provide a distinct, collegiate environment. The students can use our state-of-the-art computer laboratories and digital fabrication equipment, alongside traditional modelling and prototyping. The University of Sydney School of Architecture, Design and Planning, ranked first in Australia and 16th in the world for Architecture/Built Environment.
Estimation of program (qualities, advantages, opportunities)	The program enables students to develop efficient and environmentally responsive buildings and to retrofit existing buildings to meet today's environmental demands. The students' skills in sustainable design are enhanced through the school's expertise in the built environment. The research-leading lecturers take the students on site visits and expose them to a range of international collaborators. The program provides the students with internship opportunities with leading businesses and consultancies.
Requirements	A bachelor's degree, English.
International programmes for students of the institution	During their studies, the students can take advantage of exchange programs with leading universities and international elective units of study, to visit destinations across North and South America, Scandinavia, China, Indonesia, Japan and the UK (~300 international partners).
Contacts with (foreign) institutes	The University of Sydney has exchange partners universities across the globe, including leading universities of US, Europe and Asia.
